THE JOHN GARNER PECAN

41 NUTS PER POUND!

61 PER CENT MEAT!

This Pecan has the following superior qualities:

1. Easy to propagate.
2. Produces nutlets the first year from buds and grafts.
3. Healthy, strong and vigorous tree.
4. Bears nuts all through the top.
5. Bears every year.
6. Puts out late in spring and ripens early in fall.
7. The most beautiful nut grown. A real paper-shell, with kernels easily removed in halves.
8. Creamy plump kernels, every nut is a good one.
9. Kernels rich in oil, protein, carbohydrates, vitamins and flavor.

A Personal Word

HERBERT O'NEAL
Evergreens and Shipping

ROSS R. WOLFE, Mgr.

W. M. PETERS
Production Mgr.

In behalf of the twenty to thirty men and women who work in my nursery and orchard and our families, I wish to thank all those who have bought from me in the past and those who have said a good word for me. You know "We never have a friend too many".

I personally supervise the growing of our trees, cutting the buds from our best heavy bearing trees, keeping the stock free from insects and diseases, seeing the trees are kept true to label, properly pruned, staked and grown and dug and packed so they will reach the customer in first-class condition. I will stand back of all stock we sell.

Fine Fruits Wanted

If you have a fine plum, peach, apple or any other fruit or plant, please write me about it. I keep an experimental orchard where I test promising new varieties.

Visitors Welcome

I'm inviting you to visit our orchard of pecans, walnuts, persimmons, berries, grapes, peaches and other fruits. I will also take a pleasure in showing you our nurseries of nut trees, fruit trees and ornamentals. Our visitors are increasing each year. You are invited to come and bring your friends with you. Cash discounts of 5% to those who come to the nursery to buy.

Again thanking you for your business and good will, I am,

Sincerely yours,

ROSS R. WOLFE.

PLEASE OBSERVE WHEN ORDERING

USE THE ORDER SHEET. It will save your time and ours and reduce the possibility of mistakes.

TERMS, CASH. Send Post Office or Express Money Order, Bank Draft, Check or Stamps. We will ship C. O. D. where one-fourth of the amount accompanies the order.

SHIPPING CHARGES. All postage, express or freight will be paid on all nursery stock except pecan and walnut trees and evergreens listed in this catalogue to any point in Texas or States in the United States joining Texas.

SHIPPING SEASON. The shipping season for trees is from November 10th to March 20th. Cold storage bud and graft wood from March 1st to July 1st. Fresh buds of fruit from May 20th and fresh buds of pecans, walnut and persimmons from July 1st to September 25th.

SUBSTITUTION. Please state when ordering whether we can substitute a similar variety when we are out of the kinds named. We never substitute on commercial planting without consulting the customer.

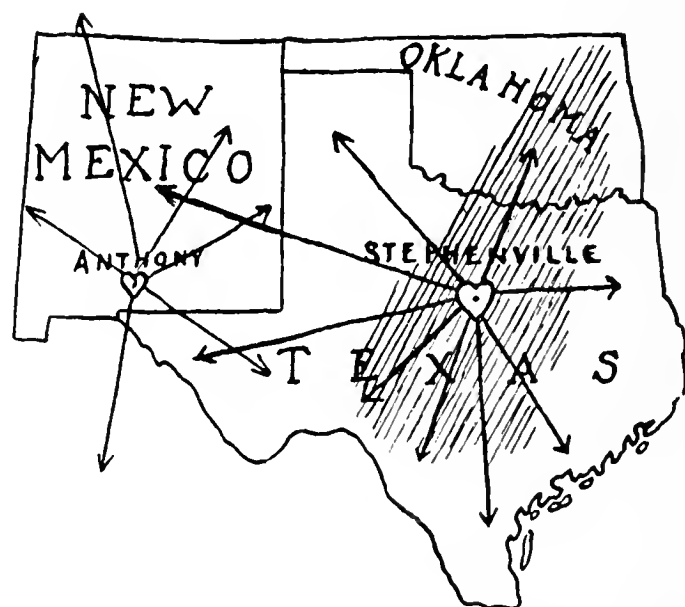

INSPECTION. A certificate of inspection from the Texas Department of Agriculture, showing that the stock has been inspected and found free from injurious insect pests and diseases will accompany each shipment.

GUARANTEE. We guarantee every plant we sell to be true to name and to be satisfactory on delivery. We will replace any plant that proves untrue to name free of charge and we will replace for one-half price all plants that die the first year after planting, provided they have been well cared for.

OPEN FOR VISITORS EVERY DAY IN THE WEEK AND SUNDAYS AFTER 2 P. M.

How to Get to the Wolfe Nursery

Stephenville is located 64 miles southwest of Fort Worth on Highways 10, 66 and 68. Our nursery office, packing shed and sales yard is two miles west of Stephenville on Highway 10. Drive to our nursery and make your own selection. Courteous, experienced salesmen are in attendance to show you around our grounds and to give you such information that you may require in your planting. If you can not come, send your order by mail and we will fill it with greatest care.

CASH DISCOUNT OF 5% TO THOSE WHO COME TO THE NURSERY TO BUY

PAPERSHELL PECANS

What Are Your Plans for the Future?

What are you doing to provide for a future income? You are growing older, your health will not always be good, some younger person may get your job. When you are older, will you be mowing lawns, on relief and live with your children?

You can be independent, happy and contented by owning your own home and having an income from a pecan orchard that will grow more valuable as the years go by. Let me tell you HOW—with pecans.

Pecans Good Insurance

Plant a pecan orchard now and be prepared for the future. A tree that costs a dollar or more will quickly grow into a tree worth one hundred dollars. Our pecan trees **begin to bear two and three years** after they are planted so your dividends begin to come in. The older the trees the bigger the income.

Pecans Will Send Your Children to College

The owner of this business has built a modern home and sent his children to college with the money from his pecans. Why not plant 50 or 100 pecan trees for each one of your children **now** so that that child may be assured of funds for their education?

Are You a City Man?

If you are on a salary, would it not be a wise thing to lay aside a part of your earnings and **buy a farm**? Life in the fresh open air and a home among trees with a few chickens, cows and a garden and **pecan trees to grow while you sleep** will contribute to the happiness and uplift to yourself and your family.

Six hundred turkeys and a nice herd of Jersey Cattle have been kept in our pecan orchard. The shade is good for the cows and turkeys which stock in turn helped keep down vegetation, control insects, and gave their droppings to enrich the soil. This orchard has made an average income of \$100.00 per acre each year for the last three years. This orchard is now fourteen years old and is growing on upland sand that formerly grew cotton, peanuts and corn.

WE PREPAY EXPRESS AND PARCEL POST CHARGES ON FRUIT TREES

This pecan tree produced 20 pounds the fifth year, 52 pounds the sixth year, 103 pounds the seventh year, 148 pounds the eighth and 250 pounds the twelfth year. This is wealth in a nutshell.

Plant Thrifty Trees

If you plan to start a pecan orchard it pays to buy thrifty trees like the ones I grow. It is very difficult to grow a stunted tree into a fast growing tree in the orchard.

Trees I Grow

The trees in my nursery are grown from special seed which produce thrifty and fast growing trees. They are grown, dug and packed in the most approved manner.

Soil Inspection

If you are in doubt as to whether or not the land you have is good pecan soil, I will be glad to inspect your land for you. By all means, do not plant a commercial orchard of pecans unless you know you have a good pecan soil. You can grow pecan trees in any yard where other trees will grow if you will give them water.

Varieties to Use

El Paso and Vicinity: John Garner, Onliwon, Western Schley and Burkett.

Oklahoma City and Vicinity: Western Schley, Sq. Delight, Burkett, John Garner and Commonwealth.

Tulsa and Vicinity: Western Schley, Sq. Delight, Stuart, Schley and Commonwealth.

Texarkana and Vicinity: Success, Schley, Stuart and Moore.

Dallas and Vicinity: Western Schley, Schley, Burkett, San Saba Improved (John Garner, Onliwon, Jersey in upland).

Austin and Vicinity: Western Schley, Burkett and Schley. (John Garner, Jersey and Onliwon in upland).

Houston and Coast below 400 feet altitude: Success, Stuart, and Moore.

San Angelo, Abilene and Wichita Falls and Vicinities: John Garner Onliwon, Western Schley, Burkett, Halbert, Texas Prolific and San Saba Improved.

CASH DISCOUNT OF 5% TO THOSE WHO COME TO THE NURSERY TO BUY

What Others Say About the Frank Peach

"The Frank Peach possesses every good quality."—F. B. Bond, Mexia, Texas.

"I put the Frank at the top of the list."—Fernando Miller, Somerset, Texas.

"My Franks have not missed a crop in twenty-one years. It is the Acme of Perfection in a peach."—W. M. Jones, Tehuacana, Texas.

"The Frank is ideally suited to this locality; it out-bears the Elberta five to one."—Geo. Robertson, Goldthwaite, Texas.

"I sold my Franks on the Houston and San Antonio markets from \$1.75 to \$2.75 per bushel."—Kurt Schroeter, Marble Falls, Texas.

"I regard it (Frank) as the most promising variety and surest bearer."—J. R. Eanes, Comanche, Texas.

"Frank produces good crops when Elberta freezes out."—Homer Hutchins, Grandview, Texas.

"The Frank means a new era in the peach business. It will keep from a week to ten days after being gathered and can be hauled to distant markets in fine condition. My seven-year Frank peach trees have averaged 6½ bushels per tree each year for the last four years."—Luther Cox, Mexia, Texas.

"The most outstanding peach produced in the Southwest."—Farm and Ranch.

See Frank Peach, pages 15 and 16.

We Grow the Genuine Risien Gold Medal Pecan Varieties.

Originator of:

Onliwon
Western Schley
John Garner
Sq. Delight
Texas Prolific
Jersey
Commonwealth
San Saba Improved

That these are the finest pecan varieties in the world is proven by the **blue ribbons** they have won, the **Gold Medal** awarded to Mr. Risien by the Texas Pecan Growers and by a Resolution of Honor from the Texas Legislature for his creations.

Nutritive Value of the Pecan

1. Protein, 11 per cent; Fats, 71.2 per cent; Carbohydrates, 13.3.
2. Contains Vitamin B.
3. Calories per pound: Meats, 810; Cereals, 1654; Pecans, 3633.
4. Fats of pecans are among the most digestible of all forms.

E. E. RISIEN
World's Foremost Pecan Breeder

PECANS

WESTERN VARIETIES

WESTERN SCHLEY: Very much like Eastern Schley, but much more prolific and suited to dryer climates and higher altitudes. The tree is healthy, prolific and regular in bearing. Becoming more popular each year. Puts out late in spring, ripens early in fall.

JOHN GARNER: (See inside front cover.)

ONLIWON: (Only One). This variety has paid Mr. Risien better than all others after 40 years' trial. Fine yellow meats come out whole. Ripe in midseason; 60% meat, shell very thin.

SAN SABA IMPROVED: This nut looks good and tastes good. Smooth, firm kernels, light colored meat and shell and the meats release readily. Ripens early. I keep these nuts for my own use.

SQ. DELIGHT: The chief merit of this variety is in its earliness of ripening, making it popular in sections having short growing seasons. Very popular in Oklahoma. The nut is long like Schley.

JERSEY: This little, oblong egg-shell variety runs 64% meat (highest on record) and is especially suited to drouthy sections. The quality of the nut is extra good and the tree is very prolific.

COMMONWEALTH: This is the latest variety to put on leaves and bloom of any variety in our orchard. This is a much better nut than Sq. Delight and should be tried out alongside of it. Long like Schley.

TEXAS PROLIFIC: As the name implies, this variety is very prolific, frequently producing nuts in the nursery row. A long nut with medium shell and beautiful markings.

BURKETT: Originated by J. H. Burkett of Clyde, Texas. One of the best varieties for West Texas. People in that section are setting more of the Burkett than of any other variety. Medium size, fills well, good flavor and prolific. 60% meat.

HALBERT: Young trees inclined to be crooked, but get straighter as the tree grows older. Very early and prolific bearer. Medium size nuts, very thin shell, excellent flavor. A good tree for black waxy land. Should not be set in Mississippi, Louisiana, East Texas or East Oklahoma. 57% meat.

SCHLEY

STUART

SUCCESS

MONEY MAKER

BURKETT

TEXAS PROLIFIC

EASTERN VARIETIES OF PECAN TREES

SUCCESS: This is the most popular Eastern variety in Texas. The nut is very large and oblong, with plump smooth creamy kernels that release perfectly from the shell. The tree is healthy and prolific and very resistant to scab. It ripens just after Stuart.

SCHLEY: This is the standard of excellence among pecans. The tree is healthy and is making good in the native pecan belt of Texas, Arkansas and Oklahoma in altitudes from 350 to 1,000 feet. Gaining in popularity and ripens early.

STUART: Stuart is a good bearer and the nuts are long and attractive. The shell is rather thick, but soft and the meats are sweet and brittle.

DELMAS: The two outstanding virtues of this variety are the beauty and prolificness of the tree and size and beauty of the nut. Its best range of adaptation is Central Texas. Ripens too late for most of Oklahoma.

MOORE: It is very resistant to scab and is one of the earliest ripeners in the list. It is a good pollinator.

RETAIL PRICE PECAN TREES PACKED F. O. B. STEPHENVILLE. (Except John Garner)

Size	1-9	10-49	50-299	300 up
2- 3 feet	\$.70	\$.60	\$.55	\$.50
3- 4 feet85	.75	.70	.60
4- 5 feet	1.00	.90	.85	.70
5- 6 feet	1.25	1.10	.95	.80
6- 7 feet	1.90	1.65	1.40	1.30
7- 8 feet	2.50	2.00	1.75	1.60
8-10 feet	3.25	2.50	2.25
10-12 feet	4.00	3.75	3.50

Pollination of Pecans

If you have a few native pecans among your budded pecans they will usually take care of your pollination problem. Where the orchard is all improved varieties some late pollen shedders and some early pollen shedders should be used.

Early pollen shedders: Western Schley, Texas Prolific, Success, Halbert, San Saba Improved, Squirrel's Delight, Moore and Onliwon.

Late pollen shedders: Burkett, Schley, Jersey, Delmas, Stuart and Commonwealth. One tree will furnish enough pollen for 10 trees.

Size of Hole for Pecan Trees

In ideal pecan soils, use a post-hole digger. The hole should be dug to a depth of about three feet. In hard soils, dig a hole three feet square and three feet deep so that the roots can get started before reaching the hard soil.

Distance for Planting Pecans

35 ft. by 35 ft. gives 35 trees per acre.
35 ft. by 70 ft. gives 17 trees per acre.
50 ft. by 50 ft. gives 16 trees per acre.
60 ft. by 60 ft. gives 12 trees per acre.
70 ft. by 70 ft. gives 9 trees per acre.

Size of Pecan Tree to Plant

The trend each year is to plant larger pecan trees. The 4 to 5, 5 to 6, 6 to 7 and 7 to 8-foot are all good sizes for commercial planting. For yards or places where pecan trees can be cared for plant trees from 7 to 12 foot for quickest and best results.

Notice

We have a few trees of the following varieties of pecans at prices quoted above: Odom, Oklahoma and Clark. Odom is one of our large eastern varieties with extremely thin shell and rich kernel. Oklahoma originated in Oklahoma and does well in that section. Clark is a medium sized nut. Ripens extremely early and is a heavy producer and regular bearer.

Walnuts

Our trees are grown from carefully selected scions from the best fruiting orchard trees under conditions of soil and climate which produce an excellent root system and a clean, vigorous top. They are grown on the native Black Walnut. Walnuts make a wonderful shade tree for the home. The trees grow rapidly after the first year and begin to bear at two or three years of age.

Wilson Wonder and Thomas Black Walnut

1-2 feet	\$.75	\$.70	\$.65
2-3 feet	1.00	.90	.80
3-4 feet	1.30	1.20	1.00
4-5 feet	1.75	1.60	1.50
5-6 feet	2.00	1.90	1.80
5-6 feet	2.00	1.90	1.80

All prices on walnut trees, F. O. B.
The Nursery.

Root Pruned Pecan Shade Trees

- 1 inch caliper, \$2.00 each; \$17.50 for 10; \$150.00 per 100.
- 1 1/4 inch caliper, \$2.75 each; \$25.00 for 10; \$225.00 per 100.
- 1 1/2 inch caliper, \$3.50 each; \$32.50 for 10; \$300.00 for 100.
- 2 inch caliper, \$6.50 each; 3 inch caliper, \$10.00 each.

Prices: Packed F. O. B., Stephenville, Texas.

Varieties: Burkett, Texas Prolific, Halbert and Western Schley. The John Garner is 50c higher than the above prices. These trees are six and seven years old with straight stems and branched tops. They were root pruned in March, 1936, cutting the tap root and some side roots causing the tree to partly recover from this shock and making it put out a heavy set of lateral roots. Most of these trees are producing nuts in the nursery, many of them ripening from 50 to 150 nuts.

JAPAN HART WALNUTS: Trees extremely hardy and vigorous growers. Nuts sweet and of best quality, very productive. Buds and grafts only for sale. Good pollinator for English Walnut.

WILSON WONDER: Called the “Jumbo Walnut” because of its enormous size, the individual nuts often measuring more than 2 inches in diameter. Offered in the stores at Christmas time for very fancy prices. Bears very young and heavily. A hardy tree.

THE THOMAS BLACK WALNUT: The Thomas is a selected strain of Eastern Black Walnut with a comparatively thin shell which cracks easily, has light colored kernels in halves, with the same old delicious flavor which tastes so good in cakes and other confections. It makes a beautiful tree anywhere and bears heavy crops even while young.

Prices on John Garner Pecan Buds and Grafts. Prepaid

75c for 12; \$1.50 for 25; \$2.25 for 50; \$4.00 for 100; \$30.00 for 1,000.

Note: Not less than 12 John Garner Buds sold.

Fresh Fruits are Luscious

“Grow your own fruit” has become a popular slogan. And there is no excuse for failing to have a few trees bearing Peaches, Plums, Pears, Figs, and Grapes in every yard. They make splendid shade in the back yard and provide Fruit that would have to be bought and usually at high prices.

A small assortment of fruit trees can find room on even a small lot, and will provide a continuous supply of varieties . . . It’s not a farm home without fruit.

GRANDE ENGLISH WALNUT

This is a new English Walnut which originated in the Southwest by planting seed of the hardy French variety, the Franquette. It will stand extremes in weather of both heat and cold. It is the hardiest variety on our grounds of 16 varieties.

Prices on Grande English Walnut Buds and Grafts, Prepaid:

12	25	50	100	500	1000
\$1.00	\$1.25	\$2.25	\$4.00	\$17.00	\$30.00

Trees: 2 to 4 ft. tops, \$1.40 each. In lots of 10 or more, \$1.30 each.

4 to 6 ft., \$2.00 each. In lots of 10 or more, \$1.90 each.

6 to 8 ft., \$3.00. In lots of 10 or more, \$2.75 each.

We have fresh buds of nearly all known varieties of pecans. We have 100 varieties.

WE PREPAY EXPRESS AND PARCEL POST CHARGES ON FRUIT TREES

PECAN BUDS AND GRAFTS

From over 100 varieties, we have selected the following from which we have buds and grafts in cold storage from March 1st until July 1st. After that date, we will ship fresh buds.

WESTERN VARIETIES:

Western Schley
Burkett
Squirrel's Delight
Onliwon
Halbert
John Garner (see inside front cover)

Jersey
Commonwealth
Clark

(The prices for Commonwealth Pecans will be found on page 9.)

EASTERN VARIETIES:

Success
Schley
Stuart
Delmas
Moore
Money Maker

PRICES:

Pecan Buds and Grafts

(Except John Garner)

Delivered by Parcel Post

25	50	100	500	1,000	5,000
\$..75	\$1.00	\$1.75	\$7.50	\$12.50	\$50.00

Note: 5c per bud will be charged when the order includes less than 25 of any one variety.

In orders including several varieties, a straight charge for each variety will be made. For example, if an order of 100 buds includes 25 buds of four dif-

ferent varieties, the price of 75c will be charged for each variety, making the amount \$3.00 for the 100 buds instead of \$1.75 as listed above.

Black Walnuts—English Walnuts

Black Walnuts and English Walnuts can be top-worked on the native walnuts.

Varieties:

Thomas Black Walnut
Ohio Black Walnut
Wilson Wonder English Walnut
Seeding English Walnut
(Seedling of Franquette)

PRICES ON BLACK AND ENGLISH WALNUT BUDS AND GRAFTS AND COMMONWEALTH PECANS

\$.75 for 12 \$2.00 for 50 \$3.00 for 100
\$25.00 for 1,000

Note: Not less than 12 Walnut buds sold. Please make bud orders total \$1.00. Walnuts bud more easily than they graft.

Grafts of Shell Bark Hickory

We have a shell bark hickory that can be budded or grafted on pecan that makes a beautiful shade tree and thin shell hickory nuts. 6-inch grafts \$1.00 per dozen. (Limited supply.)

Grafts of Japan Hart Walnut

This is a hardy walnut which we got from Japan which produces regular crops of high-class walnuts, with clusters of 5 to 12 nuts to the bunch. This variety should be budded or grafted with the English Walnuts on the native walnuts to furnish pollen for them. Buds or grafts, \$1.00 per dozen. (Limited supply.)

Texas Pecan Patch Budder

This popular and universally used knife opens and shuts, can be carried in your pocket and is in every way adapted to the needs of patch budding.

With this knife the patches can be cut and removed without the aid of any other knife. We guarantee these knives.

Prepaid — each.....\$1.50

CASH DISCOUNT OF 5% TO THOSE WHO COME TO THE NURSERY TO BUY

HARDY FRUIT TREES

Peaches

The September issue of Texas Farm and Ranch had a front page story of the peach orchard of C. E. Ames and H. S. Beauchamp of Weatherford, each of whom have sold over 10,000 bushels of peaches each year for the last four years from \$1.00 to \$2.00 per bushel. They have paid off their mortgages and built new homes. You can do the same thing.

The truck has brought the grower and the consumer closer together. Hauling fruit from 400 to 1,000 miles is not uncommon. With so many orchard trees dying out and with better transportation facilities there is not enough fruit to supply the demand.

Marked for frost resistance: XXXX means frost resistant; XXX means hardy; XX means reasonably hardy, and X means easily killed.

May Peaches

MAYFLOWER. XXXX. The earliest of all peaches and therefore valuable for

both home and commercial planting. Medium size, creamy-white skin, mottled with dark red; juicy and delicious. C. Ripe May 20th.

EARLY WHEELER. XXXX. The peach we sell for the Early Wheeler is sold by the Stark Nurseries for Red Bird Cling. The Early Wheeler is a shy bearer for me while the Red Bird Cling is a heavy bearer. It is better colored than Early Wheeler and has the same size and shipping qualities.

June Peaches

EARLY ROSE. XXXX. I was sold on Early Rose good and hard the first time I saw one of the trees in bearing. Each year I have them fruited in my own orchard I like them better. Some years they bear so much they have to be thinned. Free from rot, good canner, brilliant red, delicious and fine for market. A cling stone ripening June 10 to 15th.

ARP BEAUTY. XXX. This yellow fleshed, red cheeked, semi-cling, ripens June 10. Large, beautiful and delicious. Rather tender for shipping.

HOBSON CLING. XXXX. I have grown the Hobson Peach over 20 years and find it to be regular in bearing and one of my favorites. The fruit is size and color of Mamie Ross, more delicious and a good shipper. Ripe June 25th.

ORCHARD OF D. J. JOBES

D. J. Jobes' 70-acre orchard of PECANS and PEACHES at Gorman, Texas. Every fourth tree is a pecan. This is one of the most profitable orchards in Texas. Mr. Jobes has been one of our customers for 10 years. Trees set 30 x 30 feet.

WE PREPAY EXPRESS AND PARCEL POST CHARGES ON FRUIT TREES

CARMAN. XXXX. Introduced by J. W. Stubenrauch. Fast growing in popularity over the United States. I have the Carman from Mr. Stubenrauch. It, like Frank, never fails to bear. A large white freestone with a red cheek and fine flavor. This peach should be in every orchard. Ripe June 25th.

DR. BURTON. XXXX. I have had Dr. Burton bearing 8 years and have gotten 8 crops. It has led 73 varieties in bearing at the Iowa Park Experiment Station. The tree is a strong grower and healthy. This peach is extra large, white flesh, streaked with red and sweet buttery flavor. Better shipper than Mamie Ross. Freestone. Ripens June 25th.

MAMIE ROSS. XXXX. Originated in Dallas County, Texas. A very successful and sure bearing variety, very prolific. Large, white with cream blush on one side. White flesh, semi-cling. Ripe June 25th.

GOLDEN JUBILEE. XXXX. New-Earliest Yellow Freestone ripening about June 20th. A beautiful, very early, large, delicious and similar to Elberta. A better shipper than most early peaches. Blooms late and the tree is vigorous. Same price as Stubenrauch Varieties.

July Peaches

STARKS EARLY ELBERTA. XXX. Pictures can not do justice to this finest of all Elbertas which is supreme in size, beauty and flavor. It ripens 2 weeks ahead of Elberta and is one of the best shippers grown. I have had this peach eleven years and I recommend it for commercial and home planting. The tree is an extra strong grower. Freestone.

Mamie Ross

Red Bird Cl.

LEONA. XXXX. This is another yellow freestone, ripe one week ahead of Elberta. It is very popular among the peach growers, many of whom sell the fruit for Elberta. It is better in color and quality. You will like Leona.

ELBERTA. XX. This yellow freestone is too well known to need description and is still our best seller except the Frank. I have a fine strain of Elberta. Ripe July 20th to 25th.

INDIAN CLING. XXX. I have a neighbor who bought some Indian peach trees out of Arkansas 25 years ago. These trees are still healthy and bearing the finest large, red fleshed, blood skinned peaches I have ever seen. I have three of them in my office that fill a half gallon jar. I will pay \$25.00 for buds of a better Indian than I have.

J. H. HALE. XX. There is a big difference in Hale peaches. I got my start from F. O. Garrison of Weatherford, who won the Grand Prize at the Parker County Peach Show. One of the finest freestone peaches grown in color, flavor and shipping quality. Plant with Frank for pollination. Ripe July 28th.

SMITH. XXXX. This little, white freestone should be in every home orchard because it bears tremendous crops every year and because of that honey sweet flavor. I like to go to my Smith trees and eat the fruit right off the tree. Ripe July 10th to 15th.

SOUTH HAVEN. XXXX. Better than average size, prolific, dependable, ripens early about July 1st, juicy, yellow flesh and a freestone. Not as firm as Elberta but is a good canning peach and a good market peach. Prices same as Stubenrauch Peaches.

BELLE OF GEORGIA. XXXX. Very large, white fleshed with red cheek; firm, juicy and excellent flavor. Very hardy and grows with equal success in both North and South. Productive, early semi-free to freestone. The most beautiful white peach grown and a good canner. Ripe July 20th.

CHILOW. XXX. This pure yellow cling should be in every home orchard. There is no peach that will surpass this peach for eating and canning. Medium size and ripe July 25th.

CASH DISCOUNT OF 5% TO THOSE WHO COME TO THE NURSERY TO BUY

STARKS ELBERTA CLING. XXX. There is no need for paying three prices for this wonderful peach. D. J. Jobes of Gorman has a large planting of this variety and considers it one of his best market varieties due to its **color, quality, shipping quality and production.** Ripe with Elberta.

August Peaches

There is a strong demand for peaches after Elberta is gone. Trucks are buying watermelons and grapes and want peaches which are always scarce. Plant late fruit where you have good moisture.

HART CLING. XXXX. This is the popular peach of Parker County, Texas. September 15 issue of Farm and Ranch carries a front page story of this peach. The peach is white with red next to the seed, red cheek and an extra **good bearer and shipper.** Fine for canning. Half of Parker County's Commercial crop is Hart Cling. Ripe August 10th.

CRAWFORD LATE IMPROVED. XXXX. Mid-season yellow freestone. Our strain is larger, better quality, tree hardy and a surer bearer than the old Crawford Late. This is especially recom-

mended for home orchards and nearby markets. Ripe about 10 days after Elberta.

AUGBERTA. XX. This big freestone Elberta ripens **August 15th** when other people are sold out. Better in color and quality and a good shipper.

September Peaches

HENRIETTA. XX. A most attractive yellow clingstone. Skin rich yellow with red cheeks. High quality. Excellent table and pickling peach.

October Peach

SURPRISE. XXXX. This large white freestone gets ripe the **latter part of October** and will hang on the tree two weeks after getting ripe. It is good to eat as well as can, pickle and preserve. Due to its quality, color and time of ripening it has a great future as a **market variety.** It always wins in the late fall shows.

SEEDLING PEACH TREES. Each year I have calls for seedling peach trees. This year I have seedling **Frank** and seedling of **Hart-Cling.** Order either or both. They will not likely come true to seed but they will likely be similar to the parent. 1 yr. 3 to 5 ft. \$.15 each.

FAMOUS STUBENRAUCH PEACHES

J. W. Stubenrauch

We have arranged with Mr. J. W. Stubenrauch of Mexia, Texas, to grow his best peaches the **Frank, Katy, Tena and Barbara** which have become popular due to their frost resistance, vigor of trees and quality of fruit.

The Frank Peach has not missed a crop in 34 years.

FRANK. XXXX. I could put another X after Frank for frost resistance. A cross between Elberta and Bell's October that is fast becoming Texas' most popular peach. This **yellow cling**, named for Frank Holland of Farm and Ranch, begins to ripen just as Elberta is playing out about August 5-10th and will hang on the trees without injury several days after it is ripe. A beautiful peach, yellow, flesh, **small sound seed, firm, delicious, honey sweet flesh and juice.** The tree is an extra strong grower, **early bearer and heavy producer.** The fruit should be thinned (before the seeds are hard) to secure the proper size and quality. If you want the best peach on earth for home or market, plant the Frank.

The Frank Peach

TENA. Similar to Elberta in color and shape but from **one week to ten days earlier** in ripening. It has a **brighter red** color than Elberta and the quality is much better. It is a cross of Mamie Ross with Elberta. It **blooms late** with Mamie Ross and is **rarely injured by cold**. This high-class yellow freestone beats the Elberta to market.

BARBARA. A sister seedling of Frank but a freestone. It has the same vigor of tree and **sure bearing habit of Frank**. The peach is larger than Frank with a beautiful shape, being pointed at the

lower end. It is a good canner and shipper. A fifteen-year-old tree in the Stubenrauch Orchard has a spread of 37 feet and has borne 10 bushels at several different times. It ripens August 10th with the Frank.

KATY. Katy is the **largest yellow freestone** peach. Sometimes a single peach weighs one pound. It is a beautiful shape, color and the best of quality. **Blooms late** and **rarely ever bit by frost or cold**. It is also an Elberta and Bells October cross. It begins to ripen as the Barbara and Frank pass out.

Extra Large	.75	.65	.60	

SIX WEEKS. XXXX. The earliest good plum on the market. Large, rich red and delicious. Ripe May 20th.

AMERICA. XXXX. Tree very thrifty, symmetrical, spreading, fruit medium to large, bright golden ground with pink cheeks, flesh firm, stone medium to large, cling. Ripe June 20th. Best commercial plum.

BURBANK. XXX. Large, clear purplish red, flesh deep yellow, very sweet and agreeable flavor. Very prolific. Ripens about June 25th. Prune Burbank each year for best results

BRUCE. XXXX. Large, red, productive. A hybrid originated by Mr. A. L. Bruce of Donley County, Texas. On account of early ripening, large size, firm shipping quality, productiveness and deliciousness of flavor, we believe we should have to consider this the most profitable of all plums.

SHIRO. XXX. One of the most desirable plums over a wide area. Large to very large, oblong, clear, transparent

Burbank Plum

yellow, with very small seed; firm and fine texture, quality unsurpassed for eating and for cooking purposes. Ripe in July.

Plum-Cherry

COMPASS. XXX. Tree a vigorous grower, hardy, prolific, and bears extremely young, often fruiting in the nursery row. Fruit rather small, dark red, good for cooking purposes. Ripe in June.

America Plums

OPATA. XXXX. Tree very beautiful when in bloom and very fragrant. Fruit medium, purplish red, splashed with green, flesh greenish color and very fine flavor. Clingstone. Ripe last of June and first of July.

SAPA. XXXX. Tree dwarfish, thrifty and often sets fruit at one year of age. Fruit large, dark purple with greenish splotches, flesh rich, dark purple-red of rich flavor and with small pit. Ripe last of July and excellent for cooking.

The Opata and Sapa Plum-Cherry originated in Dakota and will stand our cold perfectly.

THE MUNSON PLUM. XXXX. When I tasted the Munson Plum I said it is as yellow as gold and as sweet as honey. It gets ripe June 1st when berries are at their best. The Munson and Bruce should not only be in every home orchard, but should be raised by all having blackberries or dewberries to sell. The Munson Plum is a great find.

Plum Cherry

German Prune

This is an even cross between plum and prune that will grow and bear in Texas. The size of the fruit is from 1½ inches to 2 inches in diameter, round in shape, blue black in color with reddish meat and very small seed. The fruit is very delicious and is good for jelly, preserves and canning. Ripens from July 10th to 20th and will stay on the trees several days after ripening. It can be marketed with the Elberta Peach. I secured my start of this from a ten-year-old tree in Comanche, Texas, which was over one foot in diameter. It has produced a crop of fruit every year.

Extra Large	.75	.70	.65	

EARLY GOLDEN. XX. This is the earliest to ripen, and the largest and most delicious of all apricots. Ripe May 15-20th. It makes the best shade and bears much better in a yard.

IMPROVED CLUSTER. XXX. I believe this is a seedling of the cluster. It bears like cluster yet it has no objectionable fiber. Sold by some nurserymen as Little Sam. Ripe June 4th.

MOORPARK. XXX. I like the Moorpark on account of its bearing, size and quality of fruit. The seed is small, flesh yellow and tender with a flavor unexcelled.

Pears

The trees are beautiful and live to a ripe old age. You will like our pear trees. Mellow pears are healthy. This list of select varieties has been reduced to such as has been thoroughly tested and proven valuable throughout the largest section of the South.

BARTLETT: Large, buttery, melting, of rich flavor. Very popular. Ripens last of July and during August.

GARBER: Resembles the Kieffer in size, appearance and quality, but matures here in August and between the Le Conte and Kieffer. A thrifty grower and valuable variety. Good to eat.

KIEFFER. Fruit large to very large, skin yellow, with a light vermilion cheek, flesh brittle, very juicy with a marked mushy aroma, quality good, matures from September to October. Tree vigorous and very prolific. Begins to bear when four years old.

THE DOUGLAS PEAR. XXXX. The outstanding feature of Douglas is early and heavy bearing. Frequently 2 and 3 year old trees will be loaded with fruit. It is blight resisting and good quality for eating, canning and preserves. Our Douglas Pears will surprise you and please you.

Extra Large	.75	.70	.65

DELICIOUS. I raised delicious apples this year that weighed nearly one pound apiece, I don't think I ever tasted a better flavored delicious raised anywhere. Ripe in September and October.

JONATHAN. The Jonathan apple is not so large but it makes up for this in color, quality and heavy bearing. It gets ripe in this section in September.

KING DAVID. Mr. J. Frank Browning of Baird, Texas, who has the largest apple orchard in this section, places the King David as his first choice. These red apples which get ripe in August sell like hot cakes. King David and Golden Delicious are good pollinators for Delicious.

GOLDEN DELICIOUS. This apple is just like Delicious except it is a golden yellow; it is a good keeper. Yellow Delicious will make you money.

YELLOW TRANSPARENT. This mellow, yellow apple really gets ripe about June 10th. The trees are very prolific and the apple is good for cooking and for early market.

Crab Apple

Price—Same as Apples

TRANSCENDANT (Siberian). July. An attractive yellow color, splashed and striped with red; bears very young. We value it highly for preserves. Buds and blossoms exquisitely beautiful.

Almonds

TEXAS. Now one of the most popular almonds commercially because of its extremely heavy, consistent crops of small soft-shelled plump nuts, excellent for shelled kernels. A late bloomer. \$0.75 each. Prepaid.

Mulberries

HICKS MULBERRY. A strong, upright, fast-growing tree with dense foliage, thriving anywhere and furnishing excellent shade. Bears good sized delicious black berries. A tree for the bird-lover, whether it be robins and bluebirds, or only white leghorns. Splendid for chicken runs. 8-10 ft., \$1.25; 6-8 ft., \$1.00; 4-6 ft., \$0.75; 3-4 ft., \$0.50.

Cherry Trees

Prices on Cherry Trees, Prepaid.

MONTMORENCY. Bright red, delicious flavor, firm fleshed for preserves, cobblers and puddings. The greatest American Canning Cherry. Tree hardy, strong, disease resistant, less affected by wet weather. Young sure bearer.

RICHMOND. Leading early sour cherry. Ripens June 15th. Fine for pies.

Pollination

Several varieties of sweet cherries should be planted together so that they may cross-pollinate, as one kind will not bear well alone.

CASH DISCOUNT OF 5% TO THOSE WHO COME TO THE NURSERY TO BUY

Figs

Figs ripen every day from June 15th till frost. Figs should be planted more extensively, do not let the sprouts and suckers grow, but prune the trees so as to have clean bodies at least two feet high. Cut tops back to six or twelve inches above ground when planting. Such trees will bear full and will stand much colder weather than if the sprouts are allowed to grow.

Prices Prepaid

Size	1-9	10-49	50-299
Small	\$.25	\$.20	\$.18
Medium	.40	.35	.32
Large	.60	.55	.50

MAGNOLIA. Very large, brownish straw color, excellent for canning and for preserves. Will bear on one year stems. More widely known than any of the other figs. Bears over a long period, having young green fruit at the same time as mature ripe fruit.

BROWN TURKEY. Medium size, purplish-brown, sweet and good. Very prolific. Has habit of bearing on new wood, even fruiting in the nursery row.

CELESTIAL. July. The common little blue fig. None is sweeter and is very hardy.

RAMSEY: This fig has been our earliest and heaviest bearer. The fruit is a light straw color, large and sweet. You will get enough figs from one of our Ramsey figs the first year to pay for it. It bears heavy in the nursery.

Persimmons

The leading fruit of the lower South. Demand increasing far in excess to their supply.

PRICES ON JAPANESE PERSIMMON TREES, PREPAID.

Size	1-9	10-49	50-299	300 up
12-18 inch	\$.25	\$.20	\$.16	\$.14
18-24 inch	.30	.24	.21	.19

3-4 feet	.50	.40	.33	.30
Large	.80	.70
Extra Large	.95	.85

Plant Persimmons, the trees live 50 to 100 years. They bear very young, bear every year, the fruit is ornamental, delicious and easily sold.

EUREKA: If you like your persimmons soft, to be eaten as a salad fruit, you will want to plant the popular Eureka. Every year more people are enjoying in November and December ripe Eureka with sugar and lemon juice, a dish fit for a king. The Eureka is a hardy variety that bears profuse crops of fruits which look like big red tomatoes. Our strain of Eureka is almost seedless.

TANE-NASH: Very large, roundish, conical, pointed very smooth and symmetrical, color of skin light yellow, changing to bright red at full maturity, flesh yellow, generally seedless, astringent until fully ripe, then one of the best.

DATA MARU: This is my largest persimmon and first to ripen. The fruit is yellow and one of the largest grown. I grew 60 of these fruits last year that measured one bushel.

Two Year	.35	.30	.25	.20
Three Year	.50	.40	.35

NIAGARA: White grape that does quite well all over the South. Cluster very large, berry very large, skin thick and tough, making it an excellent shipping variety, and opens up well and makes good appearance. Quality good. Ripens July 15th.

CARMAN: Growth vigorous; foliage never attacked by leaf folder or mildew; prolific, cluster large, conical, compact. Berries persistent, medium, globular, color black with thin skin. Tough, never cracking; pulp meaty, firm and tender when ripe. Rich quality, superior to Concord; seeds easily leaving pulp. Ripe August 10th. Makes good juice or wine.

HERBEMONT: July. Medium size; round, black; not good when it first turns black, but delicious when thoroughly

ripe. Vine robust and long lived. Also good for juice and wine.

THOMPSON SEEDLESS: The best known seedless grape, widely planted for raisins and market and a fine home fruit as well. Very large bunches of rather small greenish yellow berries, sweet and mild. Canes should be pruned long. August.

ZINFANDEL: This new California grape is bearing and doing well for Mike Boyd, Ballinger, Texas. The bunches are compact, berry black and produces enormous quantity. Planted for wine it is worth trying. Good plants 25c; large plants, 50c each, prepaid.

BLACK SPANISH: This is the most dependable grape for the Southwest. Berries compact, bunches large. A sure and heavy producer. Good for eating, juice and wine.

Thompson Seedless

ROSES

Two-Tone and Yellow Roses

PRES. HOOVER: Buds large, long and pointed; flowers large, semi-double. Color, medium orange suffused with copper red and apricot. Hardy.

PADRE: A precious little coppery red rose with glossy green foliage; buds extremely pointed with long stiff stems. Hardy.

BETTY UPRICHARD: Good size, long pointed buds opening to large semi-double flowers. Delicate salmon-pink. Reverse of petals red with copper.

LADY HILLINGDON: Apricot yellow, a free bloomer and a beautiful long pointed bud. Very hardy.

LUXEMBOURG: Long stems, flowers deep orange. One of the best two-tone roses.

MME. BUTTERFLY: A combination of bright pink apricot and gold. The tight buds are red-yellow at base. Hardy.

SUNBURST: A golden yellow rose that is thoroughly described in its name.

Pink Roses

RADIANCE: Long pointed buds of beautiful clear pink on long graceful stems open into a tulip shaped blossom.

COLUMBIA: Unequal for beauty. This rose is in bloom when all other varieties are at a standstill. Buds long pointed on long graceful stems. Flowers opening to a beautiful silvery pink blossom that is very double and lasting. My favorite in pinks.

DAINTY BESS: A striking and distinct single rose of soft pink with coppery red stamens.

ILLCHESTER: One of the largest, hardiest and richest colored of all the rose colored roses.

PRICILLA: The longest and most perfect buds of any rose grown. Beautiful soft silvery pink opening to large double blossoms. Very hardy and thornless.

BRIARCLIFF: Sport of Columbia with buds somewhat longer than Columbia. Flowers 4½ inches across when well developed.

WOLFE'S EVERGREENS

PRICES ON EVERGREENS
F. O. B. Nursery

What is B&B and NB?

"B&B" indicates where the nursery stock is taken up with the original earth in which it grew, by carefully chiseling away the soil without cracking or crumbling the dirt, which is to remain; then this ball of earth is securely inclosed with strong burlap and pinned with special needle-pointed nails, taking up all the slack in the burlap.

"NB" indicates where the stock is dug without dirt on the roots, but puddled for safety in shipping or delivering.

Broad-Leafed Plants

SENISA: This plant is the newest and most popular evergreen of ashy gray foliage, and orchid flowers which are produced throughout the summer and fall. In buckets from 50c to \$2.00.

RED LEAF BARBERRY: An evergreen with bronze red foliage in the spring and brilliant red in winter with scarlet berries. **Special, 60c each. B&B.**

ABELIA GRANDIFLORA: One of the most beautiful, popular and satisfactory broad-leaved shrubs. The graceful drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the mid-

Abelia

Nandina Domestica

dle of May until frost this plant produces an immense quantity of tubular-shaped white flowers, about an inch long, which are borne in clusters. We strongly recommend this plant for single specimens, groups or for hedges. Price, 50c to \$1.50 each. **B&B.**

NANDINA DOMESTICA. Evergreen shrub with reed-like stems springing from roots. Leaves glossy green tinged with red. In winter beautiful bronze tones are assumed. Flowers white followed by masses of small bright red berries that are held all winter. Price, 50c to \$1.25 each. **B&B.**

EUONYMUS, japonicus: Very hardy, easy to transplant. Round, dark green glossy leaves. Can be sheared into any shape. Our plants are extra bushy and are not to be compared with single stem plants. 35c each. **NB.** 75c to \$1.00. **B&B.** Large plants balled.

Have full line all broad-leaf evergreens in all sizes at right prices, both bare rooted and balled. See or write me your needs.

Arizona Cypress

ARIZONA CYPRESS: This beautiful evergreen is native in a small part of Arizona. The foliage is steel gray with a tinge of blue in winter. It is pyramidal in shape and grows to a height of 8 to 12 feet. In buckets 50c to 75c. B&B, 75c to \$1.50.

Italian Cypress

ITALIAN CYPRESS: This is a fine pole-like evergreen for planting at entrances and columns, etc. 18 to 24-inch plants in pots 50c each. B&B plants, 50c per foot.

Arbor Vitae

BERKMAN'S GOLDEN. Of dwarf habit, compact and symmetrical, almost globular as it gets older. All the branches are tipped with a bright golden tint, which is held all through the year. B&B 50c to \$2.00.

GOLDSPIRE: The outstanding golden Biota. Especially adapted for prominent areas. Large plants, B&B, \$1.50 to \$3.00.

BAKER'S PYRAMID: Pyramid type. Columnar growth; tense coloring and good appearance. B&B, from 50c to \$2.50.

BONITA ARBOR VITAE: A perfect globe, easy to transplant. Rich, dark green. B&B, from 50c to \$1.25.

RAMSEY HYBRID: This is a cross between the hardy Chinese Arbor Vitae, and the slender Pyramidal Italian Cypress, and originated in Ramsey's Austin Nursery. In a few years it has become recognized as the most valuable and attractive of the upright growing evergreens. It is not as slender as the Pyramidal Cypress, but is much more slender than the Arbor Vitae. B&B large plants from \$1.00 to \$2.00.

TEXAS BLUE ARBOR VITAE: Tall spreading upright grower, rather open. Beautiful blue-green color. Very desirable for adding color. Hardy. Large specimens, \$2.00 each. B&B.

We have a number of other varieties of Arbor Vitae priced to sell.

Bonita

Juniper Pfitzer

Junipers

PFITZER JUNIPER. Most handsome of the Juniper varieties; wide-spread horizontal branches and immense flat, irregular head of plush green foliage. The most satisfactory of the low spreading or prostrate type that we recommend for the South. Unusually beautiful in its distinctive, grayish color and irregular, flat spreading growth. Fine specimens, 50c to \$3.00 each.

IRISH JUNIPER: Slow growing, horizontal graceful branches. Dwarf. Very ornamental. Specimens, \$1.00 and up.

SPINY GREEK JUNIPER: A very ornamental tree decidedly conical in form, well branched and densely clothed with grayish-green, glaucous foliage. A distinct species of great beauty. Excellent for conifer groups, for specimens or for tubs and urns. Beautiful specimens, \$1.00 and up.

JUNIPER: Yellow and white tips, 2-3 feet. B&B \$1.75.

JUNIPER: Dark green pyramid, 4 ft., B&B \$1.50.

We have a number of other Junipers.

Privet, Amour—See Page 26.

Bridal Wreath (Spirea Van Houttei)

A well planted yard gives out a perpetual smile, winter and summer alike—to its owner's family, and every passing stranger—it radiates quiet, joy and refinement.

JASMINIUM FLORIDUM: "Dwarf bushy Jasmine". A fine low growing shrub for the foreground with slender arching branches covered all spring and summer with yellow flowers. Hardy anywhere, even in full sun. Nice sized plants, 50c and 75c.

LAVENDULA VERA, or True Lavender: Very small shrub with gray downy foliage; very aromatic; blue; hardy. Fine specimens, 50c and up. B&B.

SANTOLINA (Cotton) Lavender: A sweet smelling dwarf evergreen perennial, with silver white foliage, useful as rock or border plants, also largely used in carpet bedding. 50c to \$1.00 each. B&B.

IRIS — CRIMSON KING: One of the most attractive Iris grown. Very hardy, blooming freely both in spring and fall. Color a rich dark purple with heavily veined falls of white and yellow at the throat. 25c each, \$2.00 per dozen; \$15.00 per 100.

Flowering Shrubs

SPIREA VAN HOUTTEI: White. This is the most useful of the hardy shrubs. The flowers are in flat clusters usually an inch or more across, produced on spreading, pendulent branches often drooping to the ground. In full bloom they are a mass of white. The foliage is an attractive green which it retains late in the year. NB.

Size, 12 to 18 inches, 25c; 18 to 24 inches, 30c; 2 to 3 ft., 40c; 3 to 4 ft., 50c; 4 to 5 ft., 60c.

CREPE MYRTLE: This is typically a Southern shrub, attaining 20 feet high at ten or so years old. Blooms from June to September in hottest summers. Has plume-like clusters of crepe flowerlets. Can be planted singly, in groups or in hedge formation. Imperial Pink, Red.

Size 18 to 24 inches, 30c; 2 to 3 ft., 40c; 3 to 4 ft., 50c

CORAL BERRY: A hardy shrub, that is very useful for borders, hedges and general landscape work; has red berries in the autumn, the bush being covered with brilliant red berries. 2 years, 25c each. NB.

Crepe Myrtle

Protect Your Trees

YUCCA TREE PROTECTORS: All young fruit trees or pecan trees should be protected the first season by the use of Yucca Tree Protectors or whitewash in order to prevent sunburn which may lead to serious injury from borers and other troubles. Tree Protectors are also the finest insurance against rabbits. Easily attached.

Length 30 inches—6c each; 100 for \$5.00
Length 18 inches—5c each; 100 for 4.50
Length 14 inches—4c each; 100 for 3.75

Cornfield Beans

For ten years I have been working to get the pure strain of Cornfield Bean like they grow back in Georgia. It is hardy, and extremely prolific and while it is a pole bean it makes just as fine bush bean. In early spring or in the fall there is always a good demand for a good stringless snap bean. For fall beans I plant July 1st and I have made at the rate of from \$400 to \$1,000 per acre from year to year.

Package, 15c; Pound, 40c; 5 pounds, \$1.75
Postpaid

All the trees and plants listed in these special offers are first-class in every respect. We have selected our finest fruits and plants to make up these assortments. Under no circumstances can we change the combination in these special offers. We are making these low prices in order to acquaint you with the high quality of plants we have to offer.

(PHOTOGRAPHED) DEW-BLACKBERRY. SOME OF THE BERRIES 1 INCH IN DIAMETER

Dew-Black Berry

The Dew-Black is far superior to any berry I grow. This berry is a cross of the dewberry and the blackberry as the name signifies. The tips will root the first year, after that it stands and handles like a blackberry. Here are some of its good points:

1. Small seeds.
2. Self fertile.
3. Large as Austin Dewberry.
4. No bitter taste like Dallas.
5. Commences to ripen May 20th and ripens for 5 weeks.
6. Produces a crop every year.
7. Drouth resistant.
8. Will produce 1,000 to 1,400 gallons of fruit per acre.

PRICE OF PLANTS

Dozen 95c; 50 \$2.75; 100 \$4.90; 1,000 \$31.00; 5,000 \$125.00 — Postpaid.
